Partner: Richard Palmer
Peer Review Score for Richard Palmer: 10
Review: Richard is not the type of person to wait to get things done. He dove right into the work, and had a whole github repo set up before I even had a chance to read the instructions. He taught me a few things about repo structure and maintenance, which I really appreciate. He was on time for all meetings and we engaged in several helpful conversations throughout the project. I'd be happy to work with Richard in the future.
